Honestly, that would be Phong's but finally, here's a chain maille book devoted primarily to skills building instead of projects highlighting variations on a handful of techniques. My first book on chain maille was the classic "Great Wire Jewelry" by Irene From Peterson. Chain Maille Jewelry Workshop by Karen Karon seems to be the heir to Peterson's book. It's an anthology of chain maille weaves. There are some excellent books and DVDs on chain maille jewelry currently on the market

and those into chain maille already have them. Chained by Rebeca Mojica is probably the best not only because of the photography and stunning projects but also the quality of information and instruction. However, Chained doesn't feature the European 4 in 1 or any of the Persian Weaves but it covers the Japanese 12 in 2 which isn't in Chain Maille Jewelry Workshop. Chain Maille Jewelry Workshop has few variations on the weaves.... it's devoted teaching a diverse number of classic weaves, not just 4 or 5 weaves before the author veers off on their own unique weaves. A good chain maille book will go into the basics: wire gauges, metal types, jump ring opening and closing and the math (yikes) of doing chain maille. Karon uses the following terms for inserting a new jump ring through the intersections created by previous jump rings: TE for through the eye and AE for around the eye are used when discussing the placement of rings using clear illustrations. She provides an in-depth discussion of the all important aspect ratio. .Now for the chains.
