## Customer Reviews

NCLEX-RN 10,000 was an incredible study tool for the NCLEX. I loved how it gave rationales for not only the right answers to the well-constructed questions, but for the wrong answers as well.

Knowing WHY the wrong answers were wrong was just as helpful to me as knowing why the correct answer was correct. The book in combination with the online resource proved to be an essential study tool. Not only could I track my study progress, but I was able to see my weaknesses, thus enabling me to structure my study time accordingly. I was able to reinforce the things that I learned in nursing school, and the NCLEX-10,000 is ultimately the reason I was able to pass the NCLEX on my first try. I would definitely recommend this to anyone who is studying for the NCLEX; using it will bring confidence and ease anxiety when taking the most important test of your nursing career.

This online program claims to be adaptive but the algorithm does not discriminate between new questions and questions already answered, which means the more quizzes you take, the more repeat questions you will receive. After having only answered 1165 questions, I have been getting quizzes with as many as half of the questions being repeats - some repeated many times. I called customer service and I was told to take quizzes with less questions - I was specifically told to take five question quizzes! - to get fewer repeats. Of course I will get fewer repeats, because I am answering fewer questions! But the percentage of repeats remains the same, and increases with each test. And many of these questions are questions I have answered correctly every time, so although my "mastery" level has increased, I am still getting questions from the same difficulty level. I suspect that within a few hundred questions I am going to have to stop using the program because the number of repeats will be so high, meaning I will have only attempted a fraction of the supposed 10,000 questions. Furthermore, although the login screen has a "keep me logged in" box, it does not function and the program logs you out every ten minutes or so. That means if you go to review content or answer the phone or get something to eat, you have to log back in again, and lose your place in whatever quiz you were taking. I end up logging in several times a day. This is a very poorly

designed program with limited functionality.

I chose this 5 star rating because this product works, plain and simple. Everything people posted about the NCLEX10000 is accurate. There's ups and downs to it but if you're the type of person who has to study twice as hard or if you were unsuccessful in passing the NCLEX, this product is definitely for you. I did Kaplan and other study books/CDs prior to this but they weren't for me--I needed content rather than strategy. This helps with both. It took me about 2.5 months to go through everything (I'm sure it would've been a shorter amount of time if I spent more time studying)...but I passed in 75 questions. The questions were repetitive throughout; however, sometimes it's showing you the same type of question at different mastery levels and if it's the same exact question 5+ times, it's because that's the highest level for that type of question. Anyway, an example, a beginner type question might ask you to interpret a simple lab value...whereas the advanced question might give you many lab values but ask you to interpret the disease or disease processes relative to nursing priorities. Although there weren't many SATA questions, the amount of MC questions you receive will help you during the actual exam. Reading the rationales were key, that's where content is built. It helped exponentially when using deductive reasoning on the NCLEX. Frankly, it helped me more than I thought... midway through I became quite doubtful if the product worked for me so I'd go back and reread reviews people posted on here for reassurance. Needless to say, in the end I gained much more confidence and was very competent in my answer choices. This is not a book like people mentioned before, it's a code. Accessible on a website-- I used it on my mac desktop and laptop, ipad, and iphone...very travel friendly! TIPS: This is what I did. If I remember correctly there's about 20 sections so I planned to dedicate 2 days for each system (150-300+ questions in quizzes/day). It's very doable and at times addicting. I know for some folks 300+ questions sounds like overload but because there are so many repeats, your brain is retrained to look for certain key words where you'll eventually fly through quizzes. Rationales are short and to the point (much better than ATI and maybe even Kaplan), read them all. I didn't take too many notes either due to the repeats and thorough rationales. Stick with it kid, and you'll go far!!! Good luck!!!

I just graduated from nursing school and I used PrepU during my last 2 semesters. It really does work. One review says it's geared for the classroom. There is a way that the instructors can assign quizzes if they choose to but other than that it's individual quizzes you take. The questions start out easy and get harder as you go which is great because the NCLEX is just like that. The quizzes are

short. You can choose 5,10, or 20 questions. What I found really helpful was that it breaks down your strengths and weaknesses so you can see what areas you should study for more than others. PrepU really helped me and it worked for several of my classmates that bought it. I would recommend it to anyone that's preparing for their state boards.
