Developing ActiveX Web Controls: The Hands-On Guide To Creating Powerful Controls On The Web

Synopsis

Gives you step-by-step instructions for creating great Web controls, from simple COM objects to complex ActiveX servers with MFC. Features techniques for delivering the ActiveX control to the client, storing large data streams outside the control's normal storage, and loading large data streams "in the background." Shows you the differences between ActiveX and Java technology, and gives you the instructions you need to understand and manipulate the ActiveX registry. Gives C++ programmers a fast and easy way to jump into Web development.
