Make Your Place: Affordable, Sustainable Nesting Skills (DIY)

Synopsis

Raleigh Briggs teaches us how to craft a sustainable domestic life without relying on smelly, toxic, expensive consumer products. And it's not as hard as we may think! This hand written and drawn book of charming tutorials is both fun and accessible. It's full of simple skills that anyone can and should learn. From creating tinctures and salves to concocting all-natural cleaners and body products to gardening basics, this book is great for anyone looking to live more simply, create a comfortable nest, and truly do it yourself.

Customer Reviews

In July 2009, I demonstrated various urban sustainability projects at a festival in Baltimore City. This book was part of my natural, homemade cleaning supplies display. Dozens of people picked up the book and were very curious to know where I got it. They all wanted to purchase it right then and there. I wished I had contacted Raleigh or Microcosm Publishing to become a distributor! Throughout the day, many people asked me for natural ways to get rid of pests, clean different types of surfaces, etc. and I often picked up the book and turned right to Raleigh's very detailed Table of Contents. How to get rid of fleas? Clean wood floors? Make liquid dish soap? It's all right there. From gardening to essential oils, Raleigh included it all! Not to mention the fact that the book is beautifully handwritten and illustrated. I often get my tips from the internet, but Raleigh's book is wonderful to leave in the kitchen or bathroom as an instant recipe book and guide. A definite must-have starting

guide for anyone interested in living a more sustainable lifestyle.

I love books, and have collected quite a library of volumes relating to my varied interests. Some of those interests are natural/herbal health care, natural body care, "green" household cleaning, and urban homesteading. All of those books in my library have one or more of the same ideas contained in this little volume. Yet for some reason, I absolutely love this book. It may be the awkward but adorable handwriting complete with heart-dotted i's, reminding me of my middle school diary. It could be the cute illustrations, with flowers that talk and bubble letter titles, or the little flowers and stars that emphasize the text. I have rarely read a book of this type that uses words like "nast" and "barf", or describes how to deal with crabs or yeast infections with such aplomb. And really, while it may contain recipes and ideas I have found in many other places, it also has some very new ideas that I enjoyed with surprise. All in all, I have the strangest feeling that this book will see more use in my house than several other more comprehensive volumes in my library, and I know that I will have fun in the process.

For anybody who is wondering, this book was published by Microcosm Publishing, a DIY and punk rock publishing house. Keep this in mind when coming across "offensive" terms and phrases. Quite frankly though, I found none. I did however find this book to be extensively useful and reader friendly. The articles are all hand written in very neat penmanship, all the illustrations are hand drawn, and everything in the book has been tried out first by the author. There are three sections in the book Health and First Aid, Nontoxic Cleaning and Body Care, and Gardening. The first section includes directions on how to make tinctures and salves, a list of herbs that are antibacterial, antimicrobial, and antiviral, and also a list of which herbs and essential oils to avoid if pregnant. More useful than you know. The second section is a combination of replacements for bleach, Clorox and the like, and then recipes for herbal shampoos and whatever else you might call body care. The last section is pretty self explanatory. Gardening without choking up the ground with a jug of Wal-Mart bought chemicals. Chapters include composting, space managing and fertilizing. I personally found the First Aid section most useful, and most tailored to my needs. This book is very informative and well worth the money. It doesn't take up a load of space (roughly 7 x 5 inches and half an inch thick, 125 pages), it goes over personal safety at the beginning of the book and includes a further reading section (more DIY punk rock goodness) at the back. It isn't lofty or pompous, or some 100% organic and natural twerpy, skinny assed vegan kid preaching some rhetoric they heard in their college dorm. I think it is well written and friendly, there isn't any political

commentary slipped in between instructions on how to turn crunchy dried things into medicinal liquid (which is more rare than you would believe). It's a good book if you are interested in an alternative way to keep yourself and your home healthy and clean.

This book is a little smaller than I expected but that's not a bad thing -- it's a portable size to keep handy when you need to look something up. It's got three (all handwritten & hand-drawn) sections, one on health/beauty, one for household cleaning, and one on gardening/composting. I found the gardening/composting section most helpful with all its detailed tips and really practical hints. Trellising, sprouting, and good garden-buddies to plant together or in rotation. I was really impressed with the depth of the information in this section. I didn't get much out of the other two sections, but I'm already pretty into making my own cleaning supplies and don't keep around near as many ingredients as this book's recipes call for (so many different essential oils, for example). So it wasn't the make-me-a-better-housewife book I expected in that regard -- mostly just cream, spray, etc. recipes. But, if you don't already have your favorite recipes for, say, a window cleaner, or an ointment for a cut, you can get them here, and they look good too!

Some skills are just good to have. "Make Your Place: Affordable, Sustainable, Nesting Skills" is a collection of simple and effective skills to improve one's life around the house. The skills range from dealing with the simple messes, to the injuries one faces in life, to dealing with menstrual-cycle induced bad moods. "Make Your Place" is a fine and recommended read for anyone who wants to make their life a little smoother and more enjoyable.
