Vicki Lansky's one-woman tribute to sodium bicarbonate boggles the mind. In her own mother's words, "Who would believe she could have come up with all these uses?" Everyone knows you can cook with baking soda: it makes bread rise. It's a natural antacid. Dentists say you can brush your teeth with it. And it's quite common for to see an open box in the fridge for food odor absorption. But did you know that fridge box is only good for 3 months? After that, its freshening properties are used up. Get another box. What to do with the used-up, old box? Well, Lansky's got ideas for that, such as sprinkling the powder around the soil of tomato plants to lower their acidity and discourage pests. I haven't tried this one, yet. So, okay, I'm game. I tried a few of these 'uses' and had a darned good time doing it. My fiance thinks I'm nuts for getting so excited over baking soda, but likes that the product is undeniably cheap. Playing with powder Here are the ideas from the book that I tried, and how it all went. * Laundry Booster - On the book's recommendation, I added a 1/4 cup to my washer load, along with my detergent. Not only did my colors and whites come out brighter, but

even my workout clothes smelled nice when I took them out. Lanksy notes this boosting effect only works with liquid laundry detergents, however. I suspect the deodorizing effect works with either kind. * Garbage Disposal Maintenance - When I noticed a stink arising from the disposal after a weekend away, I immediately poured a ½ cup down the drain, followed by vinegar. It bubbled and frothed and took the nasty scent away. I didn't even need to run water after it.
